

APPLICATION TO BE ADDED TO THE CLICK ON SYSTEM

Dear Residents,

The access control system called "Click On" has been installed at Cedar Creek H.O.A. The System works off a cellular line. There is a charge for every call made to your cellular telephone. When a visitor arrives, the security officer will press your stand number on a panel which will then dial through to the telephone number you have requested to be loaded. The guard will announce your visitor – you give permission and he disconnects the call. **If you do not answer or permission is not granted the visitor will be turned away.**

Please note, we need a preferred number, then a second option and if necessary a third number may be loaded. Should your telephone number/s change, please complete this form and list all numbers to be loaded in order of preference. We also require an ID number, Postal Address, Email Address to load all details effectively.

If your visitor does not know your stand number, the guard can search by the name or telephone number that you have requested to be loaded.

Please fill out the reply slip and hand to security as soon as possible:
